

Combining all the features of a flexible hand held heater, with all the benefits of a free standing paint dryer.

The HLP1000 Series is the ideal model to compliment any existing full size drying system. Used with the stand, it also becomes an ideal additional heat source or spot drying unit.

This model is intended for use on small repairs and drying jobs, for example *Engine drying - stripe removal - filler drying - stone chip repairs and pre heating prior to spraying.*

The 1000 Series comes ready fitted with a 1.0Kw Gold short wave lamp, offering the same high output as the full size models.

1000 Series - Models available

- HLP1000** - Hand held model
- HLP1000S** - Hand held model with stand
- HLP1000T** - Two Hand held models with one stand
- HLPT** - Timer for above models
- 1000STWIN** - Twin Bracket (Allows 2 x HLP1000 to be positioned side by side on the stand giving a long heated area for bumper repairs etc.)
