

HEATLIGHT TECHNOLOGY

HLP3000

The 3000 model has three 1 KW Glare Control lamps, fitted into three individual cassettes.

Lamps emit short wave infrared heat ideal for optimizing drying of waterborne paints.

This flexible system allows each cassette to be adjusted and locked into position around the contours of the vehicle body, ensuring maximum area coverage.

Height adjustment is made using the high performance locking gas strut, offering a near weightless movement to the cassette support arm.

Typical drying cycle only costs 9 Pence (Based on 1Kw/hour of electricity costing 12 pence)

Product features include

- 500mm 1Kw High output GC short wave tubes fitted to each cassette.
- Long lamp/emitter life with an average of 6000hours. Typically 4 – 5 years continuous professional use.
- Specially designed electronic power and time control, offering 0 - 100% heat instantly through twin 30 minute timers on both the Flash and Bake settings.
- Robust steel constructed stable frame, fitted with rear wheel locking castors.
- Maintenance free cassettes with no fan or filter changes.
- Easy height adjustment by locking gas strut.
- Individually switched cassettes.
- Horizontal or vertical cassette operation.

Area coverage:- 800mm x 1000mm
Minimum operating distance:- 500mm
Max vertical curing height:- 2030mm
Max horizontal curing height:- 1800mm

Average curing specification

Filler / Stopper:- 4 – 6 minutes
Primer:- 6 – 8 minutes
Top coat:- 10 – 12 minutes

Electrical specification

220/240 Volt 3KW 50Hz single phase 12.50amps
380/415 Volt 3KW 50Hz 3 phase 4.25amps / phase
